Grand i10's Styling Concept

The Grand i10 four-door is the latest arrival in a stream of award-winning vehicles created at Hyundai's European Design Center in Frankfurt. Extending a full 230mm longer than its hatchback stablemate to achieve class-leading luggage space, the four-door balances eye-pleasing simplicity with just the right touch of urban sophistication. Up front, Hyundai's signature hexagonal grille is surrounded by a delicate strip of chrome molding and is flanked by large headlamps whose bold styling is unique to the sedan version. Chrome accents, side cladding and 14-inch alloy wheels endow the sedan with the authentic presence of a sedan.

01 > FRONT VIEW

Simple and Strong

Simplicity was the guiding philosophy of the design team behind the Grand i10 sedan. Chrome molding surrounds the hexagonal grille, a Hyundai design signature which conveys authority and strength while serving to instantly identify the sedan as a member of the Hyundai family. The message of strength and authority is echoed in the over-size headlamps which feature a wraparound design that is unique to the sedan. Fog lamps are fitted with chromed bezels for an upscale touch and are mounted closer to the ground to maximize light penetration through fog.

FRONT STYLE

Wide and hefty-looking, the front bumper shows skillful design execution. It demonstrates a perfect balance between serving practical needs such as impact safety protection and aesthetic appeal.

HEAD LAMP

Swept back for visual impact, the headlamps are encased in clear, high-impact resistant plastic and are equipped with multi-focus reflectors.

CHROME MOULDING GRILLE

The large grille does more than provoke an emotional reaction: It facilitates the intake of air to help cool the engine.

FRONT FOG LAMPS

Circular fog lamps are mounted as low to the ground as possible to help cut through fog. Chromed bezels provide a premium touch.

FRONT BUMPER

Solid and strong, the front bumper balances the need for impact protection and aesthetic appeal.

02> SIDE VIEW

A Solid Road Presence

The sedan's long rear overhang firmly sets it apart from its hatchback sibling and helps define its real road presence. Lower side garnish provides a color contrast and features a distinctively sporty "kick up." Available 14-inch wheels help define the commanding road presence of a sedan. The C-pillar has been slimmed down to achieve a lighter, airier greenhouse while helping promote improved rearward visibility.

WHEELS

Handsome looking 14-inch alloy wheels provide the crowning touch and are available in a choice of two different styles.

14" Steel Wheel Cover

14" Alloy Wheel (Clean Silver)

14" Alloy Wheel (Two Tone)

ADVANCED DOOR DESIGN

Longer doors make entry and egress easier. The side garnish along the lower door maximizes the visual impact of the character line and imparts a dynamic look.

CHROME HANDLE

Beauty lives in the details such as the grip-type door handles which are treated with a durable chrome finish. (Available only with the Smart Key option package.)

SIDE INDICATORS

The turn signal indicators are cleverly incorporated into the side mirror housing to enhance safety and aesthetics.

TURN SIGNAL LAMP

As part of the standard equipment package, side indicators are built into the front fenders to enhance visibility.

03> REAR VIEW

Reassuringly Upscale

The lines and proportions of the rear harmonize perfectly with the front and side views. Large, wraparound rear combination lamps and rear cutout reveal a carefully sculpted treatment that echoes the geometry of the front. A chromed "flying H" logo, chrome garnish over the hexagonal rear license plate cutout and aerodynamic lip across the rear deck lid provide the crowning touches.

CHROME MOULDING REAR COMBINATION LAMPS

The sculptural detail of the rear combination lamps help set Grand i10 apart from the rest of the field.

CHROME REAR GARNISH

Chrome rear garnish A delicate strip of chrome is perfectly placed to maximize visual impact and provide the perfect crowning touch to the rear view.

REAR PARKING SENSORS

Back-up warning sensors are discretely built into rear bumper to promote confident driving while in reverse gear. An audible warning is issued if too close.

HIGH MOUNTED STOP LAMP & REAR SPOILER

The rear roof spoiler enhances aerodynamics, improves aesthetics and maximizes visibility with its high mounted stop lamp.

REAR CAMERA DISPLAY SYSTEM

Rear camera display system automatically engaged when the reverse gear is selected, this optional feature reduces the risk of accidents when backing up. The image is conveniently projected onto an LCD screen mounted on the rearview mirror.
